

TEODORA BOTEZATU

WEB DEVELOPER

FULLSTACK · REACT / TYPESCRIPT · NICE, FR

PROFILE

Junior fullstack developer with 2 years building a marketplace from V1 to V2, now driving a legacy-to-React migration. Strong foundation in React, Next.js and TypeScript. Adapts fast to new tech and enjoys solving real user problems with clean, scalable code.

EXPERIENCE

APIWORK · Fullstack Developer (Work-Study) 2026 – PRESENT

- Designed and built Automator, a rule-based business-process automation tool on top of the apimo real-estate CRM – the first slice of a strangler-fig migration from a legacy PHP platform to a modern React app
- Led the rewrite of a legacy CRA frontend into a Vite + React + TypeScript + Tailwind v4 app, embedded via iframe in the existing platform as a transitional architecture
- Architected the frontend around a Zustand wizard store, reusable components and nested React Router layouts
- Implemented backend logic to cover gaps in the apimo API and its database, delivering features end-to-end

NATIVE SPACES · Fullstack Developer (Work-Study) 2024 – 2026

- Built core features for the V2 marketplace connecting event organizers with venue owners: venue landing pages, blog system and a responsive redesign across 20+ pages
- Worked on the V1 → V2 migration while shipping new features in Next.js, TypeScript, Tailwind CSS, tRPC and PostgreSQL
- Sole on-site developer in a distributed team – technical bridge between remote developers and the on-site business team for product decisions
- Implemented full-stack features end-to-end, from database schema to tRPC API endpoints to responsive UI components

EDUCATION

Software Architect – Application Dev. 2023 – 2026

RNCP Level 7 · Epitech

- Web development (HTML, CSS, JavaScript, React, Next.js)
- Full-stack application development (web, mobile)
- IoT system design & implementation
- Agile & V-cycle project management

BA – Applied Foreign Languages 2020 – 2023

RNCP Level 6 · Université Côte d'Azur

- Translation & linguistics in English and Spanish
- Business communication, economics & management
